Work Experience

- **Intern at National Remote Sensing Center, ISRO**

  Dec, 2019 - April, 2020

- **Senior Software Engineer at LTIMindtree**

  October 2020 - Present.

Project Details

I have tackled various complex projects, including migrating millions of data from SQL Server to Salesforce using an API Calls in .net core solution. I pride myself on being able to take on and overcome any challenge I encounter.

Recently, I had the opportunity to work on creating a Power Automate workflow, which streamlined the workflow process for a client, resulting in significant time savings.

Additionally, I have hands-on experience in creating a workflow which includes .net core Web APIs, which were consumed by .net core standalone console jobs to upload data to Salesforce. Also, I have created ASPX web forms with integrated database.

Additionally, I am well-versed in ServiceNow and JIRA processes, which allows me to contribute to cross-functional teams seamlessly. Also, I have provided L2/L3 support for .net and .net core applications
